

## ALTERNATE POWER SOURCE

*If you want them to call you a "miracle worker" you'll definitely need one of these!*

With the alternate power source a character may be able to **reactivate the long dead electrical systems** of the Space Hulk. Success is dependent upon any rules and restrictions provided in each system's description.

## HOVER BIKE

*Sleek lines and huge engines... Hop on this baby and ride!*  
Once per character the Hover Bike provides **20 inches of movement**. The Hover Bike can not **pass** through doors or air locks, but can deliver a character **to a portal** where he may dismount and utilize his natural **movement** to proceed. Once used the Hover Bike remains where it was left and requires an alternate power source to use again.
