

WANTED

...Any and all information leading to the arrest of the terrorist organization calling themselves **The New Reich.**

On September 17, 2027 Epic City Law Enforcement answered an emergency call in regards to a multiple murder at amphitheater 7 in the center of Triumph Park. Upon arrival it became apparent that the attack was politically motivated. Among the 38 dead and 10 wounded was Senator Edward Viore, assassinated by multiple bullet wounds to the head and torso. In addition to the Senator, many innocent attendees of and media representatives covering his last 2027 election campaign speech entitled "Envisioning a Better World For Everyone" were slaughtered indiscriminately.

Authorities were met at the scene by United Societies aerospace hero Major John Hawkins who was in attendance as Senator Viore's

special liaison to and council for his "Progress to the Stars" programs. Major Hawkins was not wounded in the altercation and was able to provide a description of the assailants. In addition, photographers from the Sanguine News Organization supplied photographic evidence (above).

Upon further investigation authorities discovered the involvement of metahumans in the incident. Witnesses report that several super powered vigilantes rose up in defense of the Senator (a public advocate of paranormal humans and their integration into all aspects of society, including state and federal government). Though their efforts to save the Senator failed witnesses say that the death toll was greatly reduced by their intervention.

Senator Viore is survived by his only child Sydney Viore who was in attendance.
